From Principal's desk

"In times of great stress or adversity, it's always best to keep busy, to plow your anger and your energy into something positive."

– Lee Iacocca

Dear APS Family,

I wish you are holding up well in this challenging period of COVID 19 and spending time taking care of yourself and your loved ones.

Our mentors and the entire team are working hard to ensure that every child of the APS fraternity is able to take full use of virtual classes. We communicate daily to assess our work, collaborate and plan for the days ahead. To further engage students, teachers share messages daily on WhatsApp groups, use Zoom Classroom, Microsoft team and You Tube videos to demonstrate the subject matter. School related announcements and queries of the students are resolved during the scheduled meeting times. We are constantly and meticulously, increasing our use of recorded lessons and learning activities. For this, I would like to give applause to our incredible teachers and the children for accomplishing the challenges posed to learning in this situation with all your efforts!

We appreciate your support and positive feedback along with photos for our newsletter! In this way we all are bonded together to spread smiles and happiness to one another while we're apart.

May the entire world remains strong and full of hope until the grounds of APS are again filled with liveliness, vitality, chirpy chuckles and warmth!

Principal

Dr.(Mrs) Tabassum Khan

Editorial

The Coronavirus pandemic has impacted the working of schools and colleges severely. According to the United Nations, more than 770 million learners worldwide are now being affected by school and university closures.

The digital media and the internet have emerged like a ray of hope in this difficult time for the schools and the students to continue with their studies. Online classes, sharing educational curriculum on the different platforms are in trend as we strive to provide and ensure adequate opportunities to learn. Students from all the age groups are enjoying online classes from their home.

As the country is under the lockdown and we are not doing much of physical work. It's also important that we should take care of our health. Doing simple exercise or yoga at home for at least an hour a day can keep us fit.

Right now, it's good to stay at home and follow the government advisory to fight this pandemic and I am sure that we shall overcome this very soon. Best wishes to everyone.

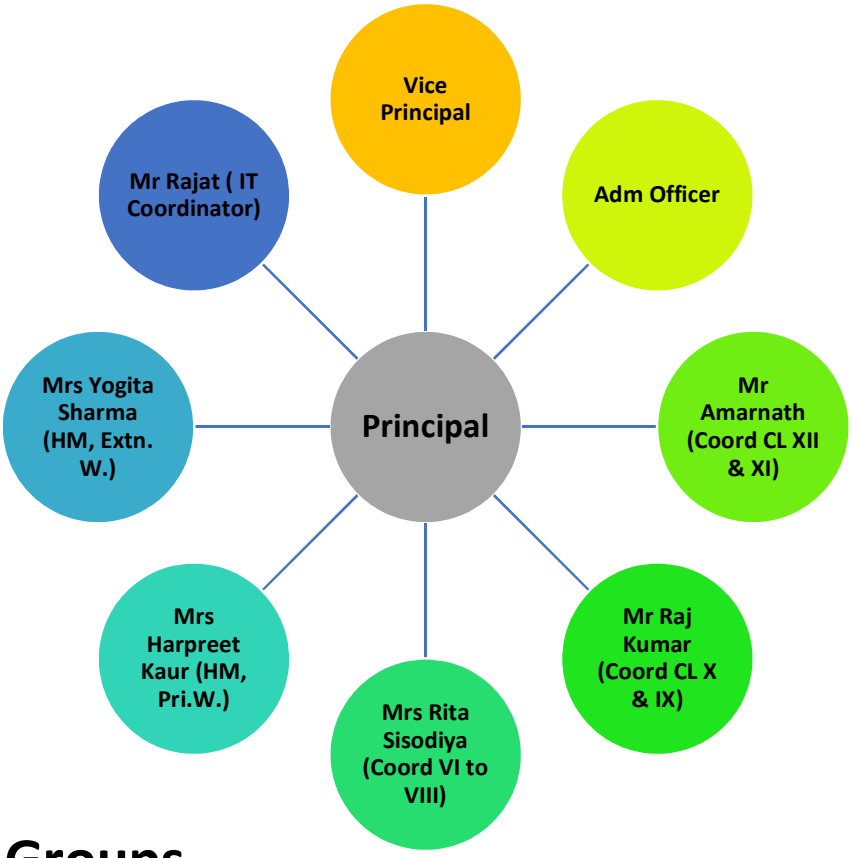

Regards

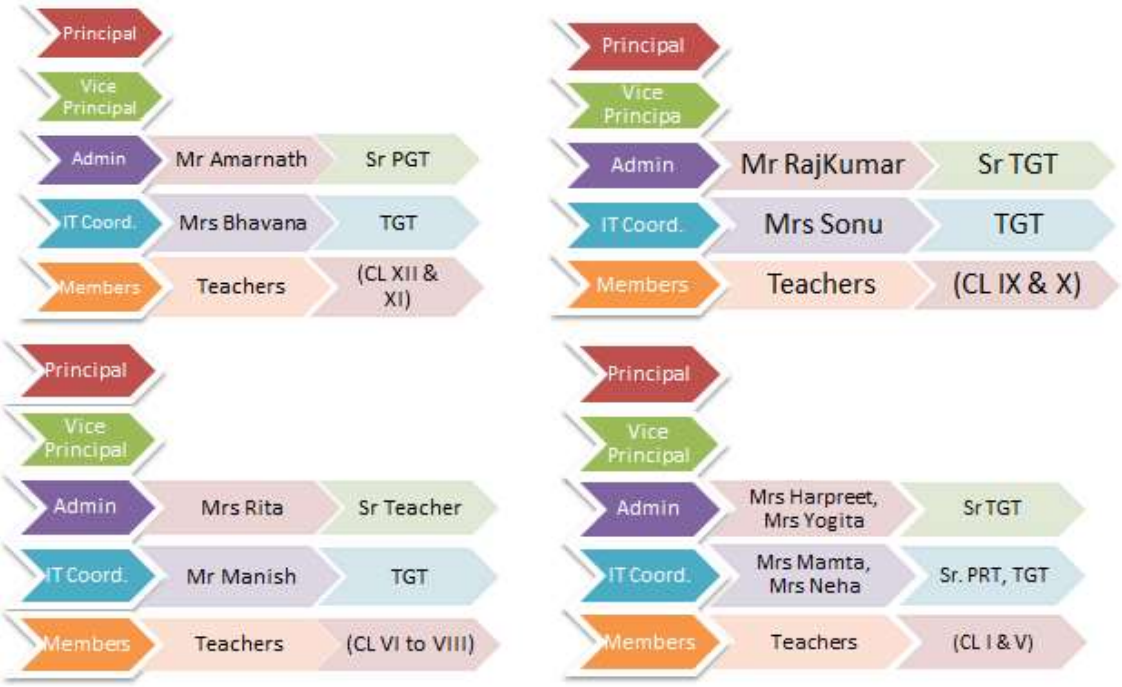

Vinita Kulshrestha

Online Classes at MS Teams

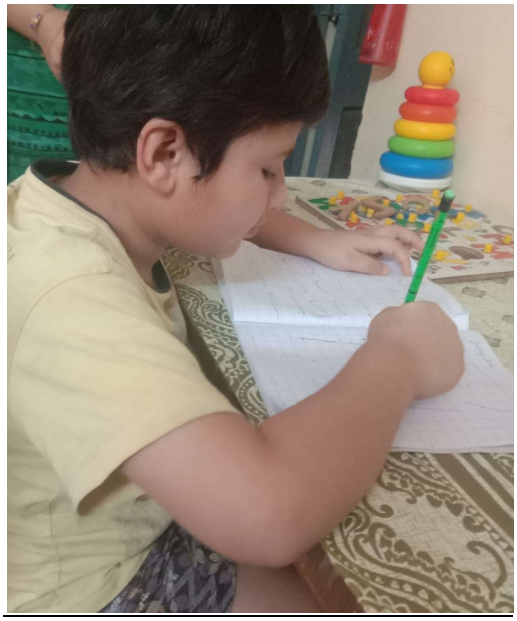

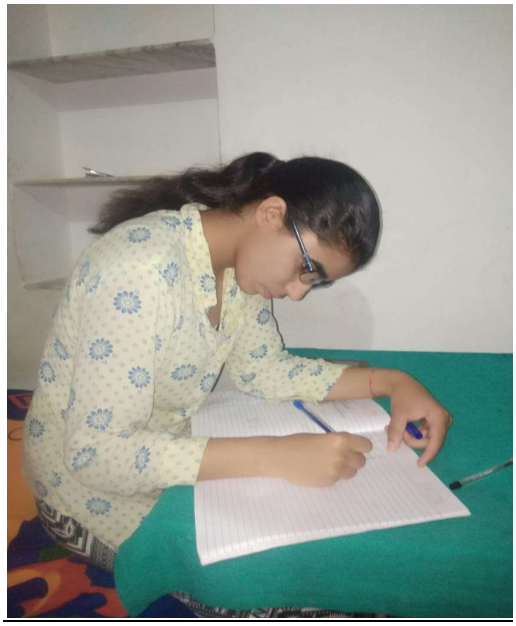

ONLINE CLASSES FOR SPECIAL NEEDS' CHILDREN

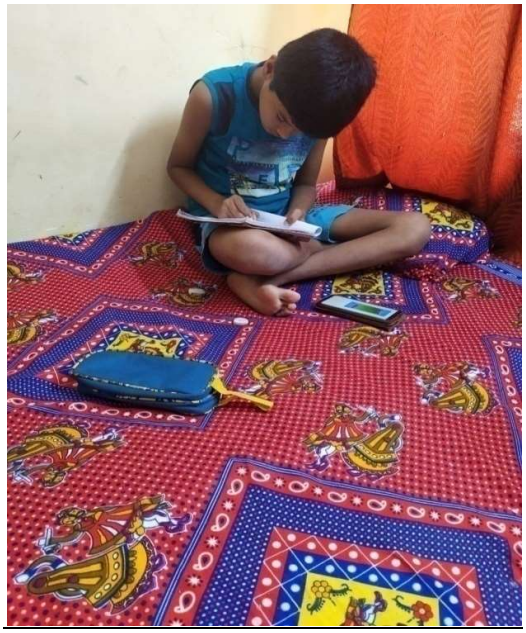

In the lockdown period, due to Corona virus we have started online classes for the special needs' children and borderline intelligence students from 2nd April. We have covered more than two topics in each subject and other playful activities to improve students' fine and gross motor at home. We are glad to see that parents are also taking interest.
We have covered the following topics with the special needs' students - Alphabet (capital and small), sawar and vayanjan, counting and number concept, parts of computer.

We have covered the following topics with Borderline intelligence students - noun, pronoun, sangya, sarvnaam, multiplication and division word problem.

ACTIVITIES BY STUDENTS

FIT INDIA MISSION

It's All About Life

We never valued our comforts and privileges

We kept on Cribbing and expressing our grudges

Everyone was restless and in a hurry.

All were running Non-Stop full of worry.

The mind was always tired and busy.

Outings and shopping were so easy .

We all were used to yearn for a single leave.

Even Sundays were used to be full of peeve.

But after the pandemic covid-19 lockdown ,

the scenario has turned just upside down.

Now all are working from home, everyday is a leave.

But eagerly waiting for some covid-19 aleve.

Roads are delightful for peacocks and crows,

Doctors and policemen are the only heroes.

But as every cloud has a silver line,

Computer technology is our only lifeline.

When this disruption will settle down ,

We will again move around in the town.

All will go back to their routine work,

Rejoicement is visible beyond the Murk.

We will again have get-togethers , parties and fun.

And there will be no one to shun.

PRIMARY WING (MAIN)

ACADEMIC REPORT FOR THE MONTH OF APRIL 2020-21

With schools being locked down due to COVID-19, educators across the country are moving to virtual classes to ensure learning never stops. Education technology companies have stepped forward to help educators reach students in virtual ways. The teachers of class 1 to 5 of APS Jodhpur are providing the e- learning material to students on regular basis. Some other platforms of E-Learning are Extra marks, Google classrooms, Khan academy; Byju's which are also very helpful for children in their studies. The teachers are sending relative e - Content (relevant video links) and study material in the form of activity based worksheets to the students through their APS digicamp document management and Whatsapp class groups. The subject coordinators along with the subject teachers are monitoring and guiding all the daily work send to the students, which include relevant questions, home assignments, projects and topic related activities as a whole. Assignments of two subjects -English, EVS and Maths, Hindi are sent on alternate days.

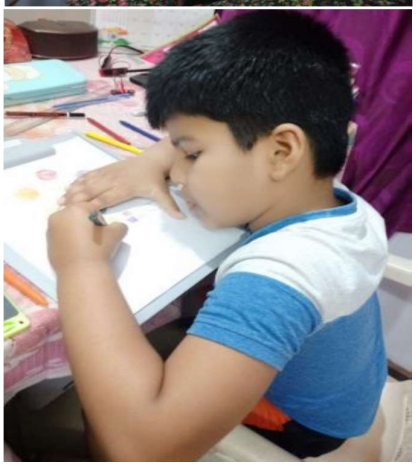

Answer keys for the worksheet is also sent to the students after 10-12 hours. Activities based on each topic are prepared and teachers guide the students to conduct the activities. GK quiz is held once in a week where 10 Questions are put forward in each class. Answer keys are sent the very next day. Art and Craft assignments are given to maintain the creativity and interest of the students. Students send the pictures of completed work at the end of the day.

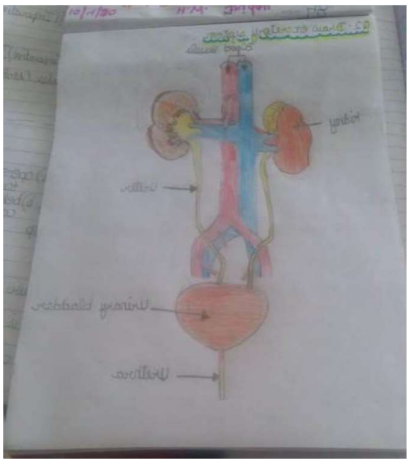

***Children doing activities and assignments at home**.*

Confidence

'C' for corona , 'C' for 'Covid – 19' and 'C' for 'Confidence.

Dear readers did you notice that all the three words begin with the English alphabet 'C' but did you feel while reading and pronouncing the first two words , we feel a little sad and nervous whereas while reading and pronouncing the third word we feel a kind of pleasure and enthusiasm flowing from head to toe.

In present situation the 'corona' and 'Covid-19' have become the synonyms of many words altogether like sadness, nervousness , fear etc. Data of spread of the 'Pandemic' and death are quite disappointing. These data bring a flood of worries, stress , fear of becoming infected, fear of losing our dear ones etc. everyday but in few moments we come out of the situation, start cleaning up our surroundings, make ourselves fresh and wear neat clothes, start our online work, magically cook something new and we don't know from where do we manage time to teach our children , play with them ,watch movies with them everyday which we used to find difficult earlier.

How does it happen? Don't we have any work during lockdown? No rather our work has increased. Earlier we had fixed working hours and used to finish up daily work and plan for the next day during those hours only but now we are busy day and night with online work or work from home which is quite a new concept for many of us. Still we have moulded ourselves and along with this we are doing many activities which we found difficult earlier. It can make us think about the factor, which suddenly appears up from the flood of deadly disappointment daily and boosts us up to do many odd things together in a well managed way. What is that factor? Of course it is our confidence. It is our confidence that first consoles us that some situations are not in our hand then it heels us by whispering in our ears that is it not a positive sign that you are alive and healthy and moreover you are with your family, job and you are blessed with all resources necessary for life and finally it pumps us up with a zeal that when you have everything, why don't you stand up and start. So, friends between many negative 'Cs' there is a positive 'C' which is boosting us up and will be required continuously after the lockdown will get over and the pandemic will be eradicated, to survive in a new kind of world which will pose many challenges every day ,before it comes in normal flow as we had before pandemic.

Let us nurture our confidence we will definitely win this fight against the virus and the upcoming challenges.

Mrs Anita Jain (PRT)

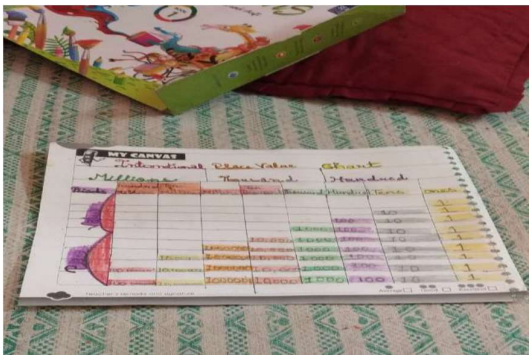

ACADEMIC REPORT FOR THE MONTH OF APRIL 2020-21

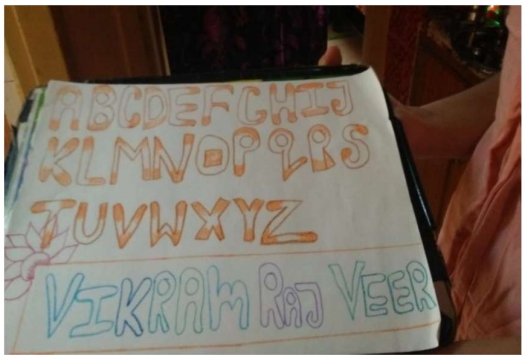

APS PRIMARY EXTN. WING

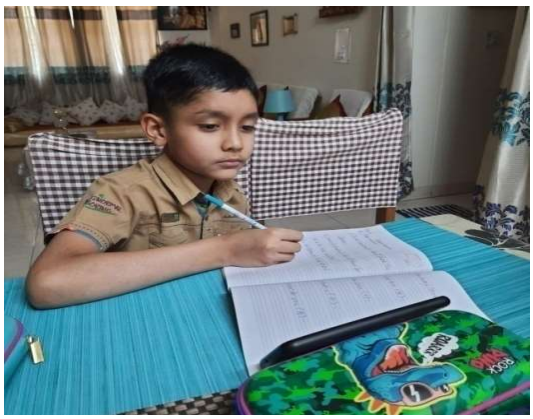

In view of the COVID-19 pandemic, the entire world is facing a serious crisis due to the rapid spread of corona virus. This pandemic has made all educational institutes, schools, colleges to remain locked down for indefinite period.

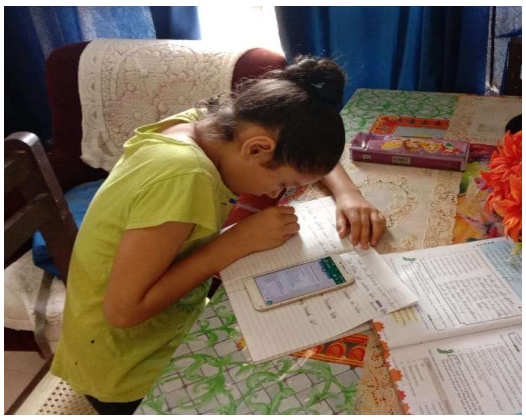

That's why CBSE Board has issued a new circular Acad/24/2020 dated 04Apr.2020 in order to adopt the e-learning for the session 2020-21, encouraging " work from home method" keeping social distancing in mind.

Similarly, APS Extn. Wing has also started following the e-learning guidelines issued by CBSE. Concerned coordinators with the respective class teachers have made the official WhatsApp group for the students of their respective classes. Students are encouraged for e-learning using various apps and links as and when suggested by the class teachers. E-learning session starts at 7:30 a.m. daily on the basis of the questions/answers posted on the official WhatsApp group/Digi camp by the respective subject teachers. After the questions/answers discussions get over, regular home assignment is also given to them and students have become habitual to submit the assignments by 3:30 p.m. Day by day students are developing more interest in e-learning and all teachers are getting positive response from them. Again at 5:30 p.m. coordinator and class teacher send the answer key in the official WhatsApp group so that all students can tally their answers. In between if any student is not able to follow the links/apps, they are free to call their class teacher. As of now, all parents are satisfied with this new e-learning method adopted by APS Extn. Wing.

FEEDBACK FOR ONLINE CLASSES

Coronavirus is a challenge for the government and all the citizens of the world. It has affected lives on a large scale all around the world. But when it comes to education, the most affected were the students of the board classes. This would have been a tough time for students but the initiative of online classes made it easy. The concept of online classes has connected the teachers and students in this complete lock down, giving a platform for discussion and information sharing. These classes enabled us to continue our studies and prevented the burden that would have been in future due to lack of time. On a personal note, I am enjoying these classes. They have been very helpful in this time period of lock down. In my point of view, these classes are just like the normal classes, we are able to discuss the topics that we didn't get, we can ask questions. There are few technical issues we face in all this like connectivity problems(which is not always). Rest everything is good. All the teachers are doing a great job by conducting these classes and I would like to thank the chairman and all the other members of the committee for this creative way of learning.

Bindu Bhuwal
XII D

We cannot go to school due to the lockdown but we can still continue our studies and keep up with our syllabus due to E-Learning
Pratap singh
9th M

I am grateful to all my teachers for their efforts to teach us during this period of lockdown.
The online syllabus provided by the teachers is quite helpful to continue our studies. The online syllabus provided is well designed and paced at a manner to keep us updated with our curriculum. It also motivates me to do my homework regularly and to keep on studying in spite of the lockdown.
Yours sincerely
Miss Kanika

I would like to appreciate our school's initiative towards rendering knowledge to the children, sitting at home, in this crucial period of pandemic, by introducing us to the online classes.
I would also like to acknowledge our teachers' efforts and the way they make classes more interactive. This turned out to be a good step as we're learning and no more wasting our valuable time, by engaging ourselves in gaining knowledge. Thanks for the efforts.
Regards
Rimpal

Name of Father- Col Jayesh Nayyar

I as parents would like to thank you so much for the online guidance you are providing these days to our kids when regular school cannot take place. Without your help and outlook, Yana would not have explored and enjoyed this new way of learning. Thank you very much for taking the pains and ensuring that these kids are able to utilise their time fruitfully and gainfully.
Student Name: Yana Nayyar
Class- 4 A

My feedback on e-learning is that it is a good way for study in this type of situation of lockdown and it a write for continue are study and it good because if we have any doubt we can ask you so I like this way of study by e-learning

views online teaching is Very good & most important in this difficult time. It's a new Experience for children.
Children are also very interested in it. So thanks APS All staff . Please keep continue.
Very very thankful.

My experience for online classes is really awesome. It gives us a platform for learning being at home and safe. Teachers really putiing their best efforts to enhance our learning and knowledge through video conferencing and virtual chats. It is really very helpful for all of us. We can easily interact with our teachers and clear all our doubts. So, I would like to say thanks to all our teachers for putting such a great effort.
Roshni

FEEDBACK FOR ONLINE CLASSES

Jai Hind
The online materials send for the home study and assignments are very helpful indeed during this lockdown, it aids me to engage n encourage my son in his study at home.
Thanks a lot mam for guiding all the students of 4 A class.
Lt Col N Sheela
Mother of S. Kanishk
4 A

Online classes are a good option at this time and they are really helping us learn better. But this is a new concept for us....and teachers are sending work continuously. So I think there should be only 2 or 3 classes in a day so that we get enough time to complete our work plus watch the videos and get ample of time for self study. This would help us understand in a better way.
Esha
X B

Online classes are the best solution in this Lockdown situation. As the studies are not getting affected. YouTube links are useful as the students can visualise things and understand them in a better way. The quality of the content and worksheet are also good. The teachers are very cooperating and always ready to support . Now online tests have started which are easily accessible. We are very excited to do the test and than enthusiastic to check our scores and also to know the correct answers.

Thanks Ma'am and the school management for all ur hard work.

Name.. Ditya gaur
Class.. VI. C

1.I am Arpit's father, my son study in class III in APS.
2.I am very satisfied with this type of study
3.my son is studying very enthusiatically.
4.The class teacher focuses on all subject.
5.Topic which is sent by the teacher in homework. His video also sent along with him.
6. My son understands the subject by watching videos and completes that homework.
7.The class teacher also sends the answer to the subject's homework later, so that the child matches his answer.
8.If there is any problem in understanding in any subject, then the teacher help in explaining that topic.
9. This type of study, there will be no burden on the child.
10. I and my child are very happy with this online study.

Online classes are helping us a lot and teachers are putting their best efforts. The Videos are easy to understand.
Renuka

FEEDBACK FOR ONLINE CLASSES

A.P.S Extension Wing, Jodhpur

During this epidemic for students future, the online classes gives more relief to the parents & students are in the touch of their study daily. They are finishing their work on time. They are connected with their faculties.
Chinmay
Class –II G

Online classes are good but not better than physical classes. Student and teacher are connected through online classes. Thank you very much.
Aditi
Class – II J

This method of teaching is actually helping kids in this lockdown situation.Everyday assignments give them the target to finish in time.Somehow they feel that they are connected to the teacher,classmates and class activities.
Anaira III –G

It is very easy for student to understand the subject through youtube.
Greeshma III-J

Ma'am the online classes are amazing. This time we are utilizing for study and doing exercises and worksheet in lockdown situation,daily two subjects homework is being sent by the school teacher and even we are engaged in doing activities. I enjoy by doing my work at home in safe zone.
Shreyanshi Pandey - IV K

Online classes are very interesting and kids find the new way of learning through beautiful animation and spend their time in a very effective way during lockdown.
Parth Singh V- J

In this situation it's a very good idea to connect with teachers. This also helps children to get connected with their studies. Lastly, I would say it's a very good idea to teach students during this lockdown period.
Akshat Thakur
Class – II H

This project is workable and it is a nice initiative. Children are curious to learn from smartphone and can focus positively.
Dhruv
Class – II J

I am thanking you for your online classes.It is very efficient for my children.
Anshaj III-H

We are very thankful to the school for this initiative.we request you to take online classes
Roshni III-J

I am grateful to all my teachers for their efforts to teach us during this period of lock down.
Disha Sharma IV-H

Teachers have created a memorable experience in the hearts of all. It's a true blessing to have your support in this moment togetherness. You look energetic and positive. We appreciate all your contribution and assistance during the entire trip. You are the back bone and pillar for guidance and your efforts are truly appreciable.
Tiya Yadav V- K

Something is better than nothing. Online learning/classes is strongly recommended till the time school reopens.
Rishav Yadav V- L

Online studies are very helpful in this time of corona epidemic and my child can study at home safely by the online assignments given by class teacher . I am totally satisfied with these online classes.
Aditya Koranga
Class - II G

During these days it's a good way to teach students.. Children are excited to attend their online classes and also is the best way connected the children with their regular studies. They are doing assignments on time and learning a lot of new ideas.
Divya Rathi
Class – II H

This time online learning is only one option ,so good experience.

Harshit III-G

Online classes are really good teaching –learning method to impart subject knowledge to children at home.It is developing habit of self study among them.I appreciate efforts of school& class teacher.
Neelesh III-J

As Online classes are a good option at this pandemic and they are really helping us learn better. But this is a new concept for children... Understanding through you tube videos is a little difficult as some videos are nice but some are not. I think teachers should send videos of themselves rather than sending you tube videos. This would help children understand in a better way. Teachers and students interactions about homework is much needed it can be through the audios..so that children will follow the instructions properly as they already attached with teachers.It is my humble request to the teachers please pay attention on the opinion..thank you.
Bhaskar - IV J

COVID CAN NOT KILL ZEAL OF LEARNERS

Due to the global COVID-19 pandemic, all the schools are closed but the studies are not stopped. In this problematic situation, our teachers have taken an initiative to help us to continue our studies. They are taking online classes on the Zoom application. These classes are like the classroom classes only. Except Sundays, classes of 40 minutes for each subject are taken daily by the different subject teachers. The teachers provide us notes and questions to practice regarding the topics which are taught in these online classes. The students can also ask their doubts from the teachers either on the Zoom application or through WhatsApp.

The teachers are trying their best to teach us so that there is no loss in our studies. Since, the teachers are doing so much for the students it is the responsibility of the students also to cooperate with the teachers and give their hundred percent to the studies. The hard work of the teachers for us in this adverse situation gives us a lot of motivation to carry out our responsibilities. These online classes provide us a platform to pursue our studies by staying at home only. In this way, we can also cooperate with the government in fighting against this COVID-19 pandemic.

Archana

COORDINATORS' EXPERIENCE OF ONLINE CLASSES

Mrs. Harpreet Kaur HM Primary Wing (Main) 	***With schools being locked down due to COVID-19, We as educators are moving to virtual classes to ensure learning never stops.*** ***It is altogether a new experience in the field of e-learning for me . The teachers were asked to create Whatsapp groups or using Digicamp to send relative E-Content and study material . I with class representatives and subject coordinators are responsible for monitoring and guiding the daily work send to the students.*** ***Students learn not to fear mistakes, but to value them. Even reading a book, or completing a homework assignment becomes a learning experience. Students are now learning in different ways in a wider variety of outside-of-school settings.***
Mrs. Yogita Sharma HM Primary Wing (Extn.) 	***As a teacher it becomes our responsibility that the learning should not stop and our students should not be surrounded with any kind of negativity. So, the APS, Jodhpur took the initiative of starting the online classes for its students. In the beginning there were few challenges but with the proper planning and guidance we have been able to conduct these online classes. Teachers at APS Primary Ext. Wing created the WhatsApp groups for the students. Assignments are sent daily, based on the split up planned for the session. Teachers have been sending the content related videos, worksheets and activities. Our students with their parents are also showing keen interest in this new way of learning. Students after completing their assignments for the day send the images of their work to the teachers for their guidance and also clarify their doubts by sending a voice message, which is responded back by the teacher. This has also brought both parents and teachers together as a team for the better teaching learning process.***
Mrs. Rita Sisodia Coordinator Middle Classes 	***I was passing my time leisurely, when a phone call from APS principal changed my life completely. I was given a challenging task to coordinate middle school for e-learning. Immediately, I got into action and choked out a 5 steps plan of action.*** ***1- Preparing a group of all students on whatsapp.*** ***2- Making admins of the group.*** ***3- Making Subject coordinator to prepare teaching materials for the students.*** ***4- prepare a weekly schedule .*** ***5- Sending teaching materials at a fix time daily and taking attendance of teachers and students.*** ***With the guidance of Principal ma'am, support from IT department and my team of teachers we could achieve our objective successfully.***
Mr. Rajkumar Purohit Coordinator Sec.Classes 	***It is a very nice and totally new experience to work as a coordinator for the secondary classes. It's really fabulous to co-ordinate a group of intellectuals and to organise them in a systematic way. I am thankful to Principal ma'am for showing trust in me and providing me this opportunity. Being a coordinator I learnt many things, how to co-ordinate with fellow teachers to make the studies organised in a better way. In the beginning, I felt nervous as online classes was a totally new concept, but with the support of all the colleagues and school IT department it became easier and enjoyable.***
Dr. Amarnath Sinha Coordinator Sr. Sec. Classes 	***Online teaching is a very new concept for all of us and being a coordinator, it was more difficult for me to understand the whole thing. Backing of School computer teachers made it all happen.*** ***Now students as well as teachers are doing very good. Few issues are there but we are sure we will overcome them also. A convenient weekly timetable has been set by the principal, management and coordinators which can help students do their work more efficiently.*** ***Principal ma'am is in touch with the teachers through video conferencing on the zoom application to take stock of the progress made and to plan further lessons. Not only this she also discusses problems and strategies.*** ***Teachers are working from home to design lessons and assignments, the work done by the students is also being assessed. Focus is not only on academic but also on co-scholastic areas.***

HOW TO INCREASE IMMUNITY AGAINST COVID-19 DURING LOCKDOWN

As Covid-19 scare grapples the whole country, people are getting concerned about their health. While practicing good hygiene is a practice everyone must adopt, the one thing you can really do is to look for ways to boost your immunity naturally.

Yoga is one way you can naturally uplift your vitality without stepping out of the comfort of your home during this lockdown.

One of the basic yoga poses, pranayama, can act as one of the simplest and effective ways to boost immunity and instil some vigour and positive energy into your body.

Pranayama (Breathing Techniques) To Improve Immune System

Yogic breathing is known as Pranayama (Breathing Techniques). Stress is one of the most serious reasons for poor immune system. When you are stressed out your internal environment is imbalanced and bacteria and viruses start attacking the body. Pranayama (Breathing Techniques) reduces stress levels and fight against anxiety to boost the immune system. Through Pranayama (Breathing Techniques) we control our breathing elongating the inhales and exhales which help to improve our nervous system, provide more oxygen in our blood and anxiety levels begin to abate. Consequently our body automatically re-balance and restore immune system.

There are mainly 5 Pranayama (Breathing Techniques) to boost your immune system.

1. Bhramari Pranayama (The Humming Bee Breathing Technique)

2. Kapalbhati Pranayama (Forehead Shining Breathing Technique)

3. Anuloma Viloma Pranayama (Alternate Nostril Breathing Technique)

4. Bhastrika Pranayama (Bellow Breathing Technique – Breath of Fire)

5. Udgeeth Pranayama (Chanting Breathing Technique)

You should do these Pranayams regularly to boost your immune system against COVID 19.

HAPPINESS IN DISGUISE

Always heard life is unpredictable,

Where future is not visible.

Still there is ray of hope,

Which shows a lot of scope.

Covid 19,the pandemic,

Introduced a new phase of academic.

Together we can and together we will,

Enhance our each and every skill.

We learnt to be techno savvy,

Which boosted confidence heavy.

It's the time for nature to heal,

And the situation for us to deal

With the hope to be soon on wheel.

Don't you think it is happiness

In disguise to relieve stress and reflect brightness.
